

# SAFETY LOCKING CORE COVER

Encompass Industries **Safety Locking** Core Covers, have been designed to fit 14", 16", 18" and 24" cored holes. The safety road covers are locked into the core hole with a patent pending locking devise.

The locking devise prevents theft, dislodging and becoming a traffic hazard, or movement of the cover and eliminate the need to bring typical construction road plates onto the job site for temporary road openings.

**Phone** (780) 982-3265
